

Give teachers back time. Build one useful AI assistant in 90 minutes.

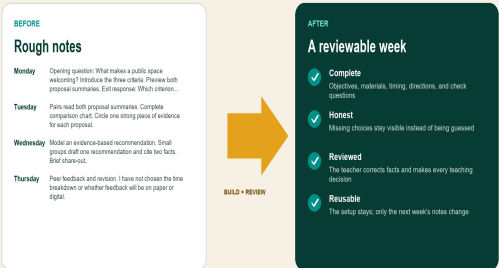

A practical, beginner-friendly lab for schools that want AI to reduce work, not add another technology burden.

Bring one recurring task. Leave with one assistant you can use again.

Andrew demonstrates a finished workflow, then guides each teacher through building and testing reusable instructions inside the AI tool and staff account the school already allows.

- No coding and no previous AI experience
- No real student information, student work, or confidential records
- One completed setup, one practice result, and one revision
- A two-week keep, revise, or stop decision

ONE REPEATED TASK. ONE REUSABLE SETUP.
What a teacher actually builds

45 + 90 + 30 Leadership setup, teacher lab, and follow-up	8–20 Educators in one cohort	\$1,500 Founding pilot; second same-day cohort \$750
---	--	--

SCHOOL READINESS	Before booking, leadership names the exact AI product and staff account, the local rules, and one school contact for questions.
-------------------------	---

Schedule a short pilot-fit conversation. Do not send student information or confidential school records in the inquiry.
