

Build one assistant you can use again

Follow six workshop steps. Write plainly. The assistant prepares. The teacher decides.

LAB BOUNDARY

Use no real student information, student work, family records, personnel records, or confidential school records.

The six steps

- 01 See the finished product
- 02 Choose one repeated task
- 03 Check the school tool and account
- 04 Build the five fields
- 05 Practice and review
- 06 Save and measure

Step 1 | See the finished product

ONE REPEATED TASK. ONE REUSABLE SETUP.

What a teacher actually builds

Rough notes → saved instructions → first result → teacher correction → reuse.

Step 2 | Choose one repeated task

A strong first task repeats, takes meaningful time, produces a reviewable draft, and can be practiced without real student or confidential information.

My repeated task	
How often I do it	
Estimated minutes now	
STARTER CHOICES	Lesson setup from rough notes • Directions formatter • Meeting agenda and follow-up organizer

Step 3 | Check the school tool and account

Exact AI product
Staff account or login path
School contact if I am unsure

- ☐ I am in the school-named tool and account.
- ☐ My practice copy contains no real people or records.
- ☐ I know what I will review before anything is used.

Step 4 | Build the five fields

- 1 Help me with Name one repeated job, not a broad role.

Help me with

- 2 Use only Name the exact blank format, rough notes, public standard, or other permitted material for this task.

Use only

- 3 Return Describe the useful shape of the first draft.

Return

- 4 Stop and ask if Name what must be present. Missing information becomes NEEDS TEACHER INPUT.

Stop and ask if

- 5 I will review Check facts, bias, appropriateness, alignment, missing information, and final wording.

I will review

Step 5 | Practice and review

**EXACT SOURCE
BOUNDARY**

Use only the text or files I give you for this task. If the information is not there, mark NEEDS TEACHER INPUT instead of guessing.

- ☐ Facts and calculations are correct.
- ☐ The result is appropriate for the audience and purpose.
- ☐ Bias, assumptions, or unfair framing have been addressed.
- ☐ Missing information is visible instead of invented.
- ☐ Final wording and instructional choices remain mine.

One correction I made

Step 6 | Save and measure

Saved assistant name

Where I saved it

Date	Task	Before	Using	Review	Result

DECISION

KEEP if useful and total time drops. REVISE if promising but the setup needs work. STOP if risk or review burden outweighs the benefit.
