

Weekly Lesson Setup Assistant

A complete example with no real people or records. Practice before using your own permitted materials.

1. Rough notes

STATE 1 OF 4

Start with work a teacher recognizes.

Andrew supplies this practice example. No student records, curriculum upload, or advance AI knowledge is needed.

ROUGH WEEKLY NOTES

Riverton Public Space Choice

MONDAY	Opening question: What makes a public space welcoming? Introduce the three criteria. Preview both proposal summaries. Exit response: Which criterion matters most and why?
TUESDAY	Pairs read both proposal summaries. Complete comparison chart. Circle one strong piece of evidence for each proposal.
WEDNESDAY	Model an evidence-based recommendation. Small groups draft one recommendation and cite two facts. Brief share-out.
THURSDAY	Peer feedback and revision. I have not chosen the time breakdown or whether feedback will be on paper or digital.
FRIDAY	Gallery walk: 20 minutes. Individual reflection: 15 minutes. Need a closing move for the remaining time.

WHAT THE TEACHER HAS

1

A blank weekly format

2

Rough notes

3

Two short practice sources

NO REAL PEOPLE OR RECORDS

The practice copy is ready to use and contains no student information.

The teacher begins with topic, timing, materials, and activity ideas.

2. Saved instructions

STATE 2 OF 4

Build five instructions. Save them once.

The teacher names the job, the permitted materials, the exact result, when the assistant must stop, and what the teacher will review.

01 HELP ME WITH	Turn my rough weekly lesson notes into my weekly lesson format.
02 USE ONLY	The blank format, rough notes, and practice proposal summaries I provide for this task.
03 RETURN	For each day, return the objective, materials, sequence and timing, student directions, two teacher check questions, and decisions still needed.
04 STOP AND ASK IF	Timing, materials, or a required fact is missing. Use only the text or files I give you for this task. If the information is not there, mark NEEDS TEACHER INPUT instead of guessing.
05 I WILL REVIEW	Accuracy, appropriateness, alignment, missing information, accessibility, and final wording.

The five fields define the job, inputs, output, stop rule, and teacher review.

3. First result

STATE 3 OF 4

Inspect the first result, not just the speed.

The assistant marks missing choices, but the teacher still checks every source claim and teaching decision.

FIRST RESULT

DAY	OBJECTIVE	SEQUENCE	DECISION
Tuesday	Compare the two proposals and select evidence for each.	Directions 5 min; partner reading 18 min; chart 17 min; evidence check 8 min	None marked
Thursday	Use peer feedback to strengthen a recommendation.	NEEDS TEACHER INPUT: time breakdown	NEEDS TEACHER INPUT: paper or digital feedback
Friday	Explain and reflect on a final recommendation.	Gallery walk 20 min; reflection 15 min; NEEDS TEACHER INPUT: closing move for remaining 13 min	NEEDS TEACHER INPUT: closing move

TEACHER CHECK

The Tuesday directions incorrectly say both proposals connect to the bus stop.

GOOD STOP

The assistant does not invent Thursday timing, Thursday format, or Friday's closing move. It marks each one NEEDS TEACHER INPUT.

The draft follows the weekly format and marks missing information.

4. Teacher revision

STATE 4 OF 4

The assistant prepares. The teacher decides.

The teacher corrects the source mistake, completes the open choices, and saves the same five-part setup for next week.

REVIEWED WEEK

✓

Tuesday now states that only Library Link Plaza has a direct bus-stop connection.

✓

Thursday includes a complete 48-minute sequence and names paper feedback.

✓

Friday includes a complete closing sequence for the remaining 13 minutes.

✓

Directions are displayed and read aloud before independent work.

✓

The teacher review line remains visible: The assistant prepares. The teacher decides.

NEXT WEEK

Replace only the rough notes and task materials. Keep the five-part setup, then review the new result before use.

The teacher corrects one issue and decides whether the result is usable.
